Back-End Software Engineer with experience building Java/Spring Boot and Python/FastAPI services, REST/GraphQL APIs, micro-service integrations, relational data workflows, and cloud monitoring systems. Skilled in PostgreSQL, testing, debugging, CI/CD, and documentation, with a focus on reliable software and effective issue resolution.

 Professional Experience

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
