github.com/oussbad

Junior Full-Stack Software Engineer with hands-on experience building Java/Spring Boot backend services, REST/GraphQL APIs, React interfaces, and microservice integrations. Skilled in PostgreSQL, Git, CI/CD, Docker, automated testing, debugging, and technical documentation. Focused on delivering secure, maintainable, and reliable product features through collaborative Agile development.

Professional Experience

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
